DETAILED ACTION

1. This Office Action is the answer to an amendment received on 5/29/2007.
2. Claims 1-13 are pending in this application. Other claims are withdrawn.

Drawings

3. This application has been filed with formal drawings which are acceptable.

Allowable Subject Matter & Reason for Allowance

4. Independent claim 1 is considered patentable over closest cited references of Chen et al. (US 20060287984 A1 – Dec. 21 2006) and Kim et al. (KR 2005049822 A – May 27 2005) because these references can not be used to reject the claimed subject matter of disclosing a method, for evaluating moving queries over moving objects, the queries and objects moving with respect to each other, besides other limitations, comprising a method involves constructing a bounding box to contain moving objects and moving queries. An object index is created for each object, and a query index is created for each query, using the box. The moving queries are periodically evaluated using the query index to determine which moving object to include in each moving query evaluation. Location information and motion information are received for each object and query.

Used for evaluating moving queries over a moving object e.g. car, airplane, cargo ship, stock price, distributed sensor reading for environmental surveillance including temperature and pressure, and public health data such as a number of sick people and a type of illness. The method evaluates the queries periodically using the query index to determine which moving object to include in each moving query evaluation, thus reducing demands on computational resources. The use of the query index and object index provides efficient evaluation and reduced costs.

5. Dependent claims 2-13 are allowable since they are dependent on claim 1.

Conclusion

6. Claims 1-13 are patentable.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose telephone number is 571-272-6759 (email address: cuong.nguyen@uspto.gov). The examiner can normally be reached on 9:30 am - 5:30 pm.
